## About Us

CEAS is an Engineering consultancy firm established in the year of 2015 with the dream of providing comprehensive hi-tech services and products. We are a team of young, talented and energetic engineers who are proven and capable of running with the time. Client satisfaction is CEAS's top priority.

Our approach to the field of Engineering is to implement the needs of clients by creating, modifying, enhancing and maintaining conformities with applicable national and international rules and standards through the most cost effective design and implementation techniques.

The carefully balanced combination of knowledge of financial conditions, the innovative approach to implementation and the experiences of works in Engineering field enhance our capabilities to effectively manage and fulfill the requirements of clients. Adherence to stringent ethical standards, as well as the use of latest Engineering methods & tools makes us capable of optimally satisfying the Engineering needs of our clients.

# Our Services

# Automation

## Energy Management System

Proper management in the use of Electric energy has become the demand of time. Every plant or facility wastes energy in hundreds of places and processes. We help you identify this wastage and reduce it. Energy management system (EMS) is a system of computer-aided tools used by operators of a facility to monitor, control, and optimize the use of the electric power.

The computer technology is also referred to as SCADA/EMS or EMS/SCADA. In these respects, the terminology EMS then excludes the monitoring and control functions, but more specifically refers to the collective suite of power network applications and to the generation control and scheduling applications.

Our energy management solution helps you reduce financial and environmental impact of wasteful energy consumption by effectively managing energy use and the factors that affect it. We help both small and large organizations in measuring, analysing and reducing energy costs by up to 30%.

## Home Automation and Lighting Control System

CEAS offers a wide variety of lighting controls that combine sophisticated design with state-of-the-art technology. These include architectural controls, daylighting controls, dimmers, fan speed controls, occupancy sensors, relay panels, timer switches and more. Our lighting controls provide precise, dependable control and complement any residential or commercial application, while offering the potential for significant energy savings.

## Industrial Automation Based on PLC

Automation has brought revolution in the field of product manufacturing. It has recently found more and more acceptance from almost all types of industries because of its huge benefits such as:

- Increased productivity
- Maximum Quality
- Greater flexibility
- High Information Accuracy
- Safety

# Electrical Services

## Design

Electricpower must be delivered to the load ends in a safe, compliant and well organized manner through the implementation of a properly planned distribution system design. CEAS offers expert designing of electric power distribution systems as per standards such as BNBC, NFPA and other international standards.

## Electrical Installation

Electrical systems require proper installation, operation and maintenance of equipment for a facility to operate safely and efficiently. Misunderstanding or misinterpretations can easily lead to unsafe conditions that put personal and facilities at risk. Our expert engineers with sharp vision are more than capable of finest installation works.

CEAS Offers following services in This Area:

- Sub-station Installation
- LT Panel Installation
- HT Panel Installation
- PFI Panel Installation
- Bus Bar Trunking System (BBT)
- Electrical Cable & Conduit Wiring
- Lightning Protection System (LPS)

This festive advertisement for Eid Mubarak features a woman in a teal dress holding a smartphone, standing next to a cartoon cow. The background is green with hanging lanterns. A central tree-like structure contains icons for various smart devices: Smart Switch, Smart Router, Smart Meter, Smart TV, Smart Phone, and Smart Watch. The company logo 'apornitech' is at the bottom right.

SWITCH

Smart  
ROUTER

Smart  
METER

The graphic is set against a green background with a subtle pattern of mosque domes. On the left, a woman in a teal dress and grey headscarf stands next to a brown cow in a grassy field. The text "Eid mubarak" is written in a stylized green font. A large green tree-like shape branches out to the right, containing six diamond-shaped frames, each with a smart home device and its name: "Smart Meter" (a meter and smartphone), "Smart Switch" (a switch and smartphone), "Smart Dimmable" (a light bulb and smartphone), "Smart Rainbow" (a rainbow light bulb and smartphone), "Smart Router" (a white wireless router), and "Smart Tank" (a black tank with a yellow cap). The "aplombtech" logo is in the bottom right corner of the graphic.

### Welcome to Reservation

Kenny Rogers ROASTERS was awarded three times in a row (1996, 1997, 1998) for the prestigious America's Choice Award Winner for the Best Chicken Chain by Restaurants and Institutions Magazine, a leading publication from USA. Kenny Rogers ROASTERS was also awarded the Master Franchisee of the Year 2000/2001 and 2002/2003 by the Malaysian Franchise Association, an affiliate of the World Franchise Council.

Berjaya Roasters (M) Sdn. Bhd. is the franchise holder for Kenny Rogers ROASTERS ("KRR") in Malaysia. The company is a wholly owned subsidiary of Berjaya Group Berhad and was incorporated in 1994.

In April 2008, Berjaya Corp Bhd (BCorp) wholly owned subsidiary of ROASTERS Asia Pacific and master franchise for Kenny Rogers ROASTERS fully acquired the chain's parent, US-based NF Roasters. Kenny Rogers ROASTERS is a mid-casual dining restaurant with roast chicken as its main core item complemented by a rich variety of hot and cold side dishes. This is made up of Kenny's famous home-made muffins, vegetable salads, pasta, soups, desserts and beverages served in a friendly and comfortable environment.

### Reservation Policy

- Personalize the customer experience through data, active listening, and customized offerings.
- Effective communication is crucial for addressing customer needs and resolving issues.
- Proper employee training and empowerment are essential for outstanding customer service.
- Maintain a strong online presence and actively manage online reviews.
- Create a welcoming atmosphere with friendly staff and attention to detail.
- Consistency in service standards across all touchpoints is crucial.

## Web Design

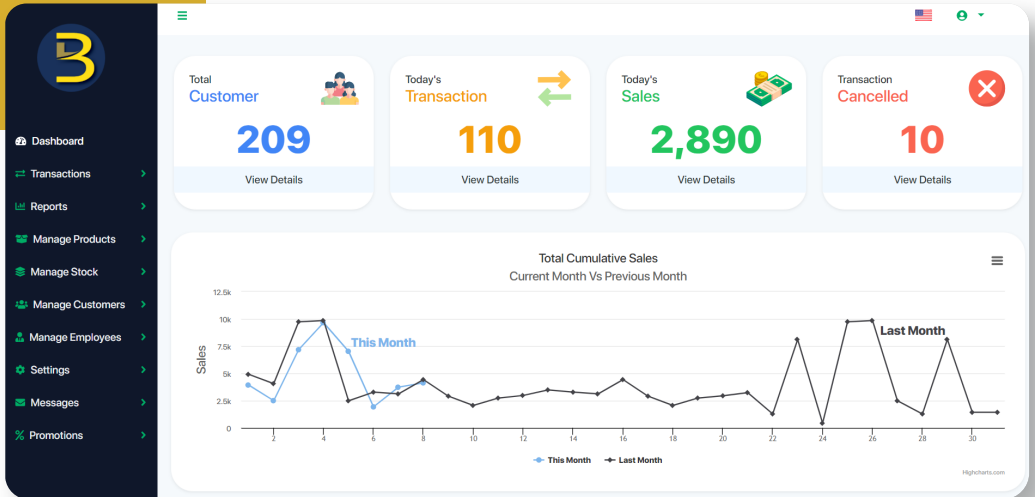

A screenshot of the 'Transactions' table in the application. The table has a dark sidebar with the same menu as the dashboard. The table header includes filters for Transaction Type, Branch, Customer, Employee, and Order Status. Below the filters are buttons for 'Filter' and 'Export'. The table columns are: ID, Date, Invoice, Branch, Customer, Employee, Order Status, Sub Total, Discount, Element Type, Item, Service Charge, and Grand Total. The table contains five rows of transaction data.

ID	Date	Invoice	Branch	Customer	Employee	Order Status	Sub Total	Discount	Element Type	Item	Service Charge	Grand Total
